There is a mistake in the definition of the electron filling in Sec. III B. The correct definition is $n = \frac{1}{4} \sum_{i\alpha\sigma} \langle c_{i\alpha\sigma}^\dagger c_{i\alpha\sigma} \rangle = 0.9$. The calculations were performed by this definition, and, therefore, the error has no effect on our conclusions.

We thank Y. Komijani and Y. Ge for pointing out our error.
