From Eq. (28) to Eq. (31), the symbols K^d and K^p have been interchanged. The text between Eqs. (30) and (31) should read, “At low temperature, K^p is small compared to K^d , and we obtain” instead of “At low temperature, K^d is small compared to K^p , and we obtain.” The results starting from Eq. (32) are unchanged.
