

Erratum: Nonstandard superconductivity or no superconductivity in hydrides under high pressure
[Phys. Rev. B 103, 134505 (2021)]J. E. Hirsch and F. Marsiglio 

(Received 11 July 2024; published 29 July 2024)

DOI: [10.1103/PhysRevB.110.019904](https://doi.org/10.1103/PhysRevB.110.019904)

The initially published version of this paper failed to fully comply with the requirements necessary for the reproduction of previously published figures.

The necessary permissions have now been obtained retroactively.

Each pertinent figure caption should also have contained the full details of the original publication instead of just the reference, for clarity and for the benefit of readers. Here are these details, and some updates. The captions of the figures referred to below should have the indicated text added:

Figure 2: From Ref. [50], P. C. Canfield *et al.*, *Physica C* **385**, **1** (2003). [Reprinted with permission from Elsevier.]

Figure 3: From Ref. [51], Y. Iye, T. Tamegai, H. Takeya, and H. Takei, in *Superconducting Materials*, edited by S. Nakajima and H. Fukuyama, *Jpn. J. Appl. Phys. Series I (Japanese Journal of Applied Physics, Tokyo, 1988)*, p. 46, and the same data was published in Y. Iye *et al.*, *Physica C* **153**, 26 (1988). [Reprinted with permission from Elsevier.]

Figure 4: From Ref. [54], D. Hazra *et al.*, *Sup. Sci. Tech.* **29**, 10501 (2016). [Reprinted with permission from IOP.]

Figure 5: From Ref. [52], S. Sundar *et al.*, *Supercond. Sci. Technol.* **30**, 025003 (2017). [Reprinted with permission from IOP.]

Figures 6 and 13 (left panel) are from Ref. [14], Snider *et al.*, *Nature (London)* **586**, 373 (2020), a paper that is now retracted, so no permissions for reuse can be granted, according to Springer Nature. However, Springer Nature has allowed for this portion to stand in view of the timeline of the original paper.

Figure 7: From Ref. [12], P. P. Kong *et al.*, arXiv:1909.10482, subsequently published as *Nat. Commun.* **12**, 5075 (2021). [Reprinted under a CC-BY license.]

Figure 8: From Ref. [7], A. P. Drozdov *et al.*, *Nature (London)* **525**, 73 (2015). [Reprinted with permission from Springer Nature.]

Figure 9: From Ref. [9], A. P. Drozdov *et al.*, *Nature (London)* **569**, 528 (2019). [Reprinted with permission from Springer Nature.]

Figure 10: From Ref. [15], D. V. Semenov *et al.*, arXiv:2012.04787. This was subsequently published as *Materials Today* **48**, 18 (2021). [Reprinted with permission from Elsevier and agreement of the authors.]

Figure 13 (middle panel): From Ref. [69], J. Song *et al.*, *Phys. Rev. Lett.* **121**, 037004 (2018). [Reprinted with permission from APS and agreement of the authors.]

Figure 13 (right panel): From Ref. [70], T. Matsuoka *et al.*, *Phys. Rev. B* **99**, 144511 (2019). [Reprinted with permission from APS and agreement of the authors.]
