
Errata

**Erratum: Electron-tunneling observation of local excited states
in manganese-doped indium
[Phys. Rev. B 21, 132 (1980)]**

J.-K. Tsang and D. M. Ginsberg

In Table I, the column labeled $2\Delta(0,0)/kT_{c0}$ should be labeled $\Delta(0,0)/kT_{c0}$.

**Erratum: Stability of ^4He superlattices on graphite
[Phys. Rev. B 20, 3641 (1979)]**

Sujane C. Wang, Legesse Senbetu, and Chia-Wei Woo

We wish to make corrections to some of the numerical results reported in the paper. The ground-state energy for $\frac{1}{4}$ coverage should be -136.3 K per particle at $T=0$, T being a variational parameter. For $\frac{1}{3}$ coverage, the ground-state energy is -136.9 K per particle at $T=0.3$. The energy difference between the superlattice phase and the uniform liquid phase remains at 1.3 K. Figure 2 now appears as below.

All conclusions, including that on the stability of the superlattice phase, remain unchanged.

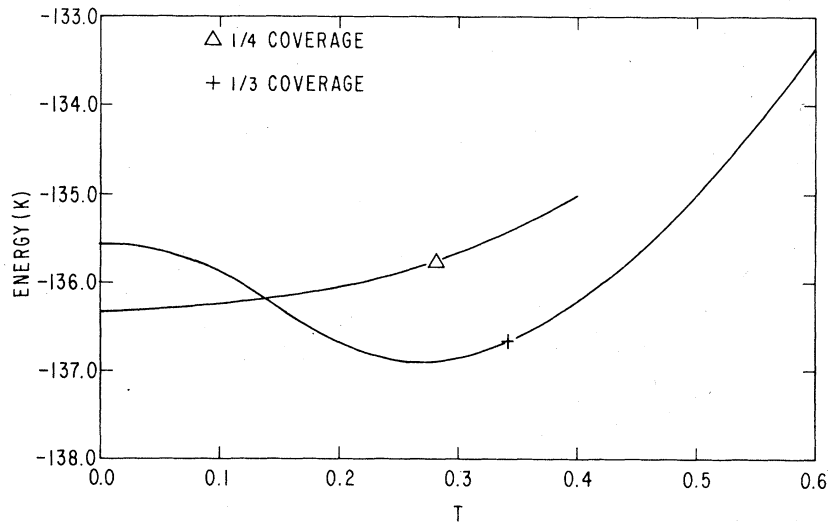

FIG. 2.
