In Fig. 1 the volume displayed is per unit cell as stated in the text, and not per atom as stated in the caption. The slope of the tangent line in Fig. 1 reveals a transition pressure of 17.5 GPa, not 24 GPa as stated on page 1 and in the caption of Fig. 1. The correction in the transition pressure affects nothing in this paper except the transition pressure itself.

We thank Jamal Uddin for suggesting to us that we had miscalculated the transition pressure.
