Erratum: Kinetic energy functional for a two-dimensional electron system [Phys. Rev. B **76**, 195103 (2007)]

M. Koivisto and M. J. Stott

After publication we became aware of a paper by J. Shao[1] which reports: "For a 2D system, the gradient expansion of kinetic energy functional results in only one term, the Thomas-Fermi kinetic energy…," one of the results reported in our paper. This paper would have been cited by us had we known of it, and we apologize for the omission.
