
Errata

Quasielastic Electron Scattering from ${}^3\text{He}$ and ${}^3\text{H}$,
D. R. Lehman [Phys. Rev. C 3, 1827 (1971)]. In
this paper, the figure captions for Figs. 8 and 9
should be exchanged and the figure caption for Fig.
2 should read: Charge form factor. Curve (A) is
the theoretical prediction with the SK ground state
and curve (B) with the Tabakin ground state. The
data are from Ref. 20.

Cross Section for $\text{C}^{12}(\alpha, \alpha n)\text{C}^{11}$ at 920 MeV, Jonathan
Radin [Phys. Rev. C 2, 793 (1970)]. The cross
section for the $\text{C}^{12}(\alpha, \alpha n)\text{C}^{11}$ reaction, reported
as 49.4 ± 1.8 mb, has been corrected to 48.9 ± 1.8
mb. The secondary corrections in Table I are
unchanged.
