In Ref. [1] there is a sign error in the definition of $\tilde{\mu}_3$ appearing in Eq. (17). The correct definition is

$$\tilde{\mu}_3 \equiv e^{\frac{11}{34} - \frac{42}{34} \log \frac{3}{2}} (8\pi x \mu_3) \approx 0.84 (8\pi x \mu_3).$$

Note that this was merely a typo that did not propagate to the plots, and hence the conclusions are unchanged.

We would like to thank T. V. I. Tenkanen for spotting it.
