Erratum: Baryon decays in a quark model with chromodynamics [Phys. Rev. D 21, 1868 (1980)]

Roman Koniuk and Nathan Isgur

In our mention of $SU(6)_W$ [and, in particular, l-broken $SU(6)_W$], we inadvertently failed to include in our Ref. 21 the very important paper by D. Faiman and D. E. Plane, Nucl. Phys. B50, 379 (1972).

This paper also contains a few transcription errors:

(1) The heading to Table III should conclude with the additional sentence: "We have suppressed a factor of $+i$ in front of all P_M amplitudes."

(2) In Table IV, $B_8 \rightarrow B_{10} M_8$ for $8\,^4P_M \frac{1}{2}^-$ and $8\,^2P_M \frac{1}{2}^-$, and $B_{10} \rightarrow B_{10} M_8$ for $10\,^2P_M \frac{1}{2}^-$ should have S replaced by D.

(3) In Table V all factors of K^4 should be divided by α^4.

Our results are, of course, unaffected.
