Erratum

Erratum: Prospects for a second neutral vector boson at low mass in SO(10)
[Phys. Rev. D 25, 3036 (1982)]

Richard W. Robinett and Jonathan L. Rosner

Equation (3.19) should read

$$M_1/M_0 \approx 1 - \tfrac{9}{50} R^{-1} \tag{3.19}$$

and three lines above this we should have "...and hence $\epsilon \approx \tfrac{9}{25} R^{-1}$, independent..." (i.e., $R \rightarrow R^{-1}$ in both places). The first line (left-hand side) of Eq. (4.14) should read

$$\tfrac{6}{5}(I_{3L} - \sin^2\theta\, Q) - (\tfrac{8}{5})^{1/2}\chi$$

[i.e., a χ should be added after the factor $-(\tfrac{8}{5})^{1/2}$].

None of the conclusions are affected.
