Erratum

Spontaneous Breakdown of Conformal and Chiral Invariance, R. J. Crewther [Phys. Rev. D **3**, 3152 (1971)]. Equations (2.47) and (2.48) should be ignored. Equations (2.44) and (2.46) imply no new constraints on l because the disconnected $\langle N|N\rangle\langle 0|e^{i\alpha D}P_0 e^{-i\alpha D}|0\rangle$ dominates $O(\alpha^2)$ terms in the inequality. The rest of the paper, including the discussion immediately prior to Eq. (2.46), is not affected.
