We mistook the contributions from the down-quark loop. The expressions (4.9) and (4.12) should be

$$M_\nu^d = S_1 \text{Tr}(H_d H_d),$$

and

$$M_\nu^d = S \text{Tr}(H_d H_d),$$

respectively. Therefore, the expressions (4.15), (4.17), and (4.18) were inadequate. Although the conclusion that the ra-

diative neutrino mass matrix M_ν^{rad} is described by two rank-1 matrices is unchanged, the form is given by a rather simpler form,

$$M_\nu^{rad} = m_0(PSP + kS),$$

instead of the previous expression (4.20). The discussions in Appendices B and C which were based on the wrong expression (4.20) should be removed. This change does not affect the idea of the R -parity violation mechanism in the paper.
