

**Erratum: Two-loop high-energy electroweak logarithmic corrections  
in a spontaneously broken  $SU(2)$  gauge model  
[Phys. Rev. D 72, 051301 (2005)]**

In the second line of Eq. (3) in the coefficient of the single logarithmic term  $34441/216 - 1247\pi^2/18$  should be replaced by  $48049/216 - 1679\pi^2/18$ . In the second line of Eq. (4) in the coefficient of the single logarithmic term  $51613/216 - 815\pi^2/18$  should be replaced by  $38005/216 - 383\pi^2/18$ . In the six lines of Eq. (5) the numerical coefficients in front of  $\mathcal{L}$  should be  $-60.87, -757.35, -91.92, -312.90, -666.05, -919.35$ , respectively. All the above modifications do not change the qualitative structure of the corrections and the conclusions of the paper. For completeness, below we present the corrected Figs. 1 and 2 with the numerical results.

We thank M. Aybat, L. Dixon, and G. Sterman for a very useful communication which helped us to localize the error.
