Erratum: Connection between Newtonian simulations and general relativity [Phys. Rev. D 83, 123505 (2011)]

Nora Elisa Chisari and Matias Zaldarriaga

In our original paper, there is an error in Eq. (A8). This correction has no consequence whatsoever in the procedure or conclusions described in the manuscript. The corrected expression for ζ is

$$\zeta = \frac{2}{3}\sqrt{\frac{3}{8\pi G}}\theta^2\left(\frac{u}{\theta}\right)'$$

and it reduces to the same expression as Eq. (A4).
