This paper was published online on 17 January 2017 with tagging errors in the text on page 1. On page 1, the seventh sentence in the right-hand column should read as “It is worth noting here that the color reconnection explains the data including the high- p_T ($p_T < 10$ GeV/ c) particles, while the signals of hydrodynamic collectivity are seen [7–12,15] up to the intermediate- p_T ($p_T < 2$ GeV/ c) range”. The paper has been corrected as of 23 January 2017. The text is correct in the printed version of the journal.
