The right bottom panel of Fig. 4 in the Letter refers to the Lorentz factor  $E = 1.01$  and not to  $E = 1.5$  as reported in the Letter. For completeness, we show here the waveforms for both  $E = 1.01$  and  $E = 1.5$ . All conclusions of the Letter remain unchanged.

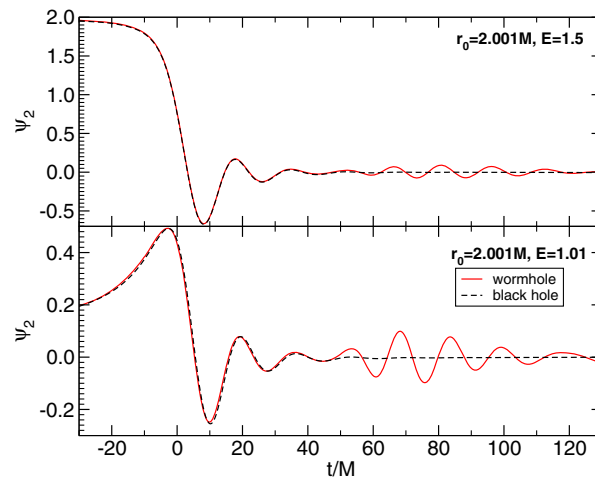

FIG. 4. Gravitational waveform for the same process presented in the right panels of Fig. 4 in the Letter, but for two choices of the Lorentz factor:  $E = 1.5$  (top panel) and  $E = 1.01$  (bottom panel). The right bottom panel of Fig. 4 in the Letter erroneously shows the  $E = 1.01$  case instead of the  $E = 1.5$  case, as reported in the caption of that figure.
