

NOTICE

The Letter "Study of Small-Scale Filaments of Light in CS_2 Under Picosecond Excitation" by R. Cubeddu, R. Poloni, C. A. Sacchi, O. Svelto, and F. Zaraga, published in Physical Review Letters of 26 April 1971, also appeared in Optics Communications of March 1971 under the title "Steady State Pulse and Steady State Diameter in Trapped Filaments of Light." This duplication was caused by our misunderstanding of a communication received in our editorial office. The authors are in no way to blame for this unfortunate occurrence.
