**ERRATA**

---

ARE THE  $D$  MESONS DIQUARKS? Berthold Stech [Phys. Rev. Lett. 38, 304 (1977)].

In the text and in Eq. (8), replace  $s_L^{1C}$  and  $s_L^{2C}$  by  $(s^{1C})_L$  and  $(s^{2C})_L$ , respectively.

In Ref. 4 read "... *Current Induced Reactions*, edited by J. G. Körner, ...."

PHASE DIAGRAM OF THE ISOTROPIC ANTI-FERROMAGNET  $\text{RbMnF}_3$ : TEST OF SCALING AND RENORMALIZATION-GROUP CALCULATIONS. Y. Shapira and C. C. Becerra [Phys. Rev. Lett. 38, 358 (1977)].

Equation (1) should read

$$\Delta T \equiv T_c(H) - T_N = AH^{\tilde{\nu}} - BH^2. \quad (1)$$

In the seventh line from the bottom of page 359, first column, read  $\Delta T = T_c(H) - T_N$  instead of  $\Delta T = \Gamma_c(H) - T_N$ .
