
ERRATUM

Vacuum Tunneling Current from an Adsorbed Atom.
N. D. LANG [Phys. Rev. Lett. 55, 230 (1985)].

Correction of a programming error has the effect of making the calculated current enhancements for Na and Ca still greater than those given in the paper, and of leading to a current enhancement (albeit extremely small) even in the case of S. The corrected current-density maps will be given elsewhere.
