

average current was $\lesssim 10^{-11}$ A)." This misprint represents a misstatement of our experimental conditions by a factor of ten thousand million.

Polarization Effects in Collision-Induced Intramultiplet Mixing for $\text{Ne}^{}\{(2p)^2(3p)\} + \text{He}$.** M. P. I. MANDERS, J. P. J. DRIESSEN, H. C. W. BEIJERINCK, and B. J. VERHAAR [Phys. Rev. Lett. **57**, 1577 (1986)].

Throughout the paper, the phrase "polarized-emission cross sections" should be replaced by "polarized-atom cross sections."
