**ERRATUM**

---

**Comment on “Commutator of the Quark Mass Matrices in the Standard Electroweak Model and a Measure of Maximal  $CP$  Nonconservation.”** R. HUERTA and R. PÉREZ-MARCIAL [Phys. Rev. Lett. **57**, 2874 (1986)].

Our attention has been drawn to the related work of M. Gronau, A. Kfir, and R. Loewy [Phys. Rev. Lett. **56**, 1538 (1986)]. These authors studied the general conditions to obtain a  $CP$ -conserving theory for an arbitrary number of generations. However, the emphasis was different than in our work.
