Order-Parameter-Conserving Antiferromagnets. P. PRELOVŠEK and T. M. RICE [Phys. Rev. Lett. **59**, 1248 (1987)].

Recently it has been pointed out to us by Belorizky that a related problem has been treated by Belorizky and co-workers,^{1,2} who found an exact ground state of the anisotropic Heisenberg model on a simple cubic lattice under the condition of a strong anisotropy $J'_1 = -J'_1$.
