ERRATUM

Vortex-Ring Model of the Superfluid λ Transition.
GARY A. WILLIAMS [Phys. Rev. Lett. **59**, 1926 (1987)].

In Eq. (5) the c should be C.

In the first expression of the third line following Eq. (5) k should be K.

The integral of Eq. (11) should have an additional factor of $y_0 = \exp(-2\pi^2 K_0 C)$. I thank F. Lund for pointing out this omission.

In the numerical computation of K_r, a value of A_0 too large by a factor of π was inadvertently used. Correction of this shifts the T_c of the transition somewhat, changing the critical value of K_0 to $K_{0c} = 0.174$, but has little effect on the exponent v. None of the conclusions of the paper are altered by this correction.
