**Collective Enhancement of Three-Body Recombinations in Highly Ionized Classical Plasmas.** M. RASOLT and F. PERROT [Phys. Rev. Lett. **62**, 2273 (1989)].

We have recently learned of a prior collective plasma mechanism for atomic recombination by M. D. Girardeau and F. A. Gutierrez, Phys. Rev. A **38**, 1624 (1988). We wish to thank Dr. Girardeau for bringing this to our attention.

**Comment on "Condensation of an Instanton Gas."** ULRICH WEISS and HERMANN GRABERT [Phys. Rev. Lett. **63**, 1537 (1989)].

The limiting exact value of the pair potential given in the seventh line below Eq. (1) should read  $\varphi(0) = -6S_1/\hbar$ .
