[S0031-9007(98)05759-7]

We have found a computational mistake in Eq. (22). It should read

$$\frac{\delta T_f}{T_f} = 7.68(q - 1). \quad (22)$$

This changes the bound, Eq. (23), to

$$|q - 1| < 3.4 \times 10^{-3}. \quad (23)$$

The conclusions are, however, unaffected.
