

Erratum: High Pressure Behavior of ZrW_2O_8 : Grüneisen Parameter and Thermal Properties
[Phys. Rev. Lett. 84, 3879 (2000)]

T. R. Ravindran, Akhilesh K. Arora, and T. A. Mary

The value of the bulk modulus B used in Eq. (1) was taken from Ref. [14] as $4.8 \times 10^{10} \text{ Nm}^{-2}$. This was pointed out [27] to be inconsistent with that of isothermal compressibility χ_T ($1.38 \times 10^{-2} \text{ GPa}^{-1}$ from Ref. [10]) used in the expression for Grüneisen parameter. If a value of B ($7.25 \times 10^{10} \text{ Nm}^{-2}$) consistent with that of χ_T is used in Eq. (1) one gets a value of thermal expansion coefficient α as $-9.9 \times 10^{-6} \text{ K}^{-1}$, which is in better agreement with the reported value of $-(11 \pm 2) \times 10^{-6} \text{ K}^{-1}$.
