Equation (6) on p. 4 of our Letter contains a typographical error. The correct dependence on  $\sigma^2$  should be  $(1/2)\sigma^2$  and not  $(5/2)\sigma^2$  as published. Therefore the equation should read as

$$G(t_I) = \frac{1}{\sigma\sqrt{2\pi}} t_I^{-1} \exp\left[-\frac{1}{2}\left(\frac{\ln t_I + (1/2)\sigma^2}{\sigma}\right)^2\right],$$

which was the actual form used to analyze the experimental data. No other part of the Letter is affected by this correction. Particularly, the fitted value for  $\sigma$  remains the same, i.e.,  $\sigma = 0.255(6)$ .
