There is an error in Eq. (1). The correct coefficient of the second-to-last term on the right-hand side is  $\sqrt{\alpha^3/(2\pi)}$  and not  $\sqrt{\alpha^3/(8\pi)}$ , as erroneously presented. All calculations were performed using the correct formula, hence none of the results, figures, and conclusions of this Letter are affected. We thank Sarah Overduin for bringing this typographical error to our attention.
